BRITISH GRADING LISTS 1979

This year's National Grading List is based on performance during the 12-month period ending on 30.4.79, except for those players marked with an * where it has been necessary to include results at the previous twelve months average in order to base the grade on a minimum of 30 games. Players marked with a + played fewer than 20 games in the most recent twelve months (a minimum of 10 games being required) and such grades do not count towards title qualifications.

The foregoing also applies to the Combined Union Lists which do not now include the Scottish and Welsh players, these being shown separately. The title of 'Expert' has now been introduced by the B.C.F., commencing with the present list. *British Expert* (BX): held by players who achieve a BCF grading of at least 200 in two consecutive lists. *Candidate Expert* (CX): held by players who achieve a BCF grading of at least 175 in two consecutive lists. These titles will only be held whilst the player continues to retain the appropriate standard reflected in the grading list. The BCF have also approved the introduction of 'classes' of players as follows: *Class 'A'*: players with a current BCF grading of 150 and over; *'B'*: 125-149; *'C'*: 100-124; *'D'*: under 100. (*The above information is extracted from Bryan Threadgall's preamble to this year's Grading Lists*).
